

Review Checklist

1) Formatting / Style of Code

a. HTML / CSS

- Use only HTML 5.
- Indent by 2 spaces at a time.
- Use only lowercase.
- Use double quotation marks “” when possible.
- Remove trailing whitespaces.
- Omit the http or https from source code resources.

b. Javascript

- Always use semicolons.
- Indent by 2 spaces at a time.
- Use double quotation marks “” when possible.
- Remove trailing whitespaces.
- Use string concatenation for long strings.
- Use this naming convention:
functionNamesLikeThis, variableNamesLikeThis, ClassNamesLikeThis,
CONSTANT_VALUES_LIKE_THIS, foo.namespaceNamesLikeThis.bar,
and filenameslikethis.js

2) Commenting / Modularity of Code

a. Use meaningful names that describe what the object is being used for.

b. Use the following header:

```
/******/  
// Filename: Customer.cpp  
// Created: John Doe  
// Change history:  
// May 5th, 2014 / John Doe  
// Nov 12th, 2015 / Sara Smith  
/******/
```

c. If a function or section of code isn't obvious, use the following guidelines for commenting it:

```
/******/  
// Description: This section of code / function does this.  
/******/
```
